By George A. Articolo : Partial Differential Equations & Boundary Value Problems with Maple V submissions from 2014 amoroso jon william 2014 reactive probes for manipulating polyketide synthases and even more account options sign in; search settings Partial Differential Equations & Boundary Value Problems with Maple V:

George Articolo covers all the material found in traditional partial differentiation equations and boundary value courses in this textbook Its unique approach allows students to learn the mathematics first then use Maple graphics capabilities to visualize both static and animated behavior of the solution The book provides many example problems using commands that render two or three dimensional animated graphics The author focuses on the natural union
