By Richard E. Crandall : Topics in Advanced Scientific Computation author index volume 24 2014 vol 24 iss 08 the finiteness problem for automaton semigroups is undecidable vol this article itemizes the various lists of mathematics topics some of these lists link to hundreds of articles; some link only to a few the template to the right Topics in Advanced Scientific Computation:

The major differences between this book and richard s previous title published with TELOS in Jan 94 are that a in

Projects theory was stated then projects listed as exercises In Topics there will be a set of problems while the author will refer to some of the more useful algorithms in the Prjects text most algorithms in the Topics vilume will be distincly new Also b while Prjects in a course book in context and design with assigned Problems Topic This book is a fascinating glimpse into the mathematical and algorithmic byways into which one may be led from areas as diverse as signal analysis and complexity theory Scientific Computing World
