By Mark S. Daskin : Network and Discrete Location: Models, Algorithms, and Applications definitions deep

learning is a class of machine learning algorithms that pp199 200 use a cascade of many layers of nonlinear processing units for feature an artificial neural network is a network of simple elements called neurons which receive input change their internal state activation according to that input Network and Discrete Location: Models, Algorithms, and Applications:

Praise for the First Edition This book is refreshing to read since it takes an important topic and presents it in a clear and concise manner by using examples that include visual presentations of the problem solution methods and results along with an explanation of the mathematical and procedural steps required to model the problem and work through to a solution rdquo mdash Journal of C
