A cutting edge look at the emerging distributional theory of sorting Research on distributions associated with sorting algorithms has grown dramatically over the last few decades spawning many exact and limiting distributions of complexity measures for many sorting algorithms Yet much of this information has been scattered in disparate and highly specialized sources throughout the literature In *Sorting: A Distribution Theory* leading authority Hosam Mahmo Discussion of a range of common sorting approaches with emphasis on and analysis of the distributions associated with the complexity measures on the algorithms American Mathematical Monthly March 2002 this book in addition to being a re
