**By E. L. Lawler, Jan Karel Lenstra, A. H. G. Rinnooy Kan, D. B. Shmoys : The Traveling Salesman Problem: A Guided Tour of Combinatorial Optimization** cs 101 introduction to computing principles 3 5 units introduces the essential ideas of computing data representation algorithms programming quot;codequot; computer alexander hendrik george rinnooy kan scheveningen 5 oktober 1949 is een nederlandse wiskundige en senator rinnooy kan is hoogleraar economie en bedrijfskunde aan The Traveling Salesman Problem: A Guided Tour of Combinatorial Optimization:

2 of 2 review helpful An excellent book for attempts to solve computationally intractable problems By Malay Dutta The question of existence of polynomial time algorithms for hard problems now classified to be computationally intractable is one of the most challenging open problems in Theoretical Computer Science Even mathematicians has named it as one of the Millenium problems and have announced a 1 million dollar prize Provides an in depth treatment of the Traveling Salesman problem the archetypical problem in combinatorial optimization Each chapter deals with a different aspect of the problem and has been written by an acknowledged expert in the field Focusses on the essential ideas in a self contained manner Includes exercises and an extensive bibliography From the Publisher Provides an in depth treatment of the Traveling Salesman problem the archetypical problem in combinatorial optimization Each chapter deals with a different aspect of the problem and has been written by an acknowledged expert in the field F
