**By George Christakos : Random Field Models in Earth Sciences (Dover Books on Science)** science creation and evolutionism response to the latest anticreationist agitprop from the us national academy of sciences nas science evolution and creationism my 8 year old son is very worried about earth being destroyed by the sun when it becomes a red giant billions of years from now i have tried to comfort him by Random Field Models in Earth Sciences (Dover

Books on Science):

1 of 1 review helpful An outstanding treatise on random models in Earth Sciences By Secluded Path This is an excellent book a clear and comprehensive text on modelling in the Earth Sciences using random variables The author spends a good deal of space and effort discussing different applications and the many details that appear when you try to apply models I also find interesting that the philosophical side of the field This graduate level text surveys the problems of earth and environmental sciences by means of theoretical models that have as an essential basis a purely random element In addition to introducing students to spatiotemporal modeling as a fundamental methodology in the earth sciences this volume illustrates the role of spatiotemporal modeling in the general framework of the scientific method Starting with discussions of the science of the probable the variou
