By A. S. Troelstra, H. Schwichtenberg : Basic Proof Theory (Cambridge Tracts in Theoretical Computer Science)

providing researchers with access to millions of scientific documents from journals books series protocols and reference works constructive mathematics is positively characterized by the requirement that proof be algorithmic loosely speaking this means that when a mathematical object is Basic Proof Theory (Cambridge Tracts in Theoretical Computer Science):

This introduction to the basic ideas of structural proof theory contains a thorough discussion and comparison of various types of first order logic formalization Examples are given of several areas of application namely the metamathematics of pure first order logic logic programming theory category theory modal logic linear logic first order arithmetic and second order logic In each case the authors illustrate the methods in relatively simple situations and then
