By Erich Neuwirth, Deane Arganbright : The Active Modeler: Mathematical Modeling with Microsoft Excel helping us make and share calculations with ms excel xlc software to display ms excel formulae in mathematical notation repository of solved problems covering many investment banking private equity finance jobs and internships established in 2002 and with more than 34000 professionals graduating from our The Active Modeler: Mathematical Modeling with Microsoft Excel:

0 of 1 review helpful Four Stars By Tom G Very good Has been very helpful 19 of 19 review helpful An ideal text for those modeling with Excell By A Customer This text is a softcover even though at this time still lists it as a thin hardcover It is written on the same level as Giordano Wier and Fox s Mathematical Modelling but focuses directly on

the use of Micr This is a hands on introduction to modeling a wide variety of applications in Microsoft Excel It features numerous tutorials and applications to illustrate how to model and solve problems in Excel It can be used by itself or as a supplement to a text in Mathematical Modeling or Liberal Arts Mathematics Neuwirth and Arganbright offer a more accessible and hands on alternative than do other modeling texts Prologue Preface 1 Introductory Models Fibonacci Numbers Growth Models Extended Growth Models Comparing Different Growth Models 2 Dynamical Models and Difference Equations Simple Epidemics Harvesting Models Population Dynamics A Predator Prey Mode
