By Marián Vajtersic: Algorithms for Elliptic Problems: Efficient Sequential and Parallel Solvers (Mathematics and its Applications) cs 101 introduction to computing principles 3 5 units introduces the essential ideas of computing data representation gary scotts collection of source code links Algorithms for Elliptic Problems: Efficient Sequential and Parallel Solvers (Mathematics and its Applications):

This volume deals with problems of modern effective algorithms for the numerical solution of the most frequently occurring elliptic partial differential equations From the point of view of implementation attention is paid to algorithms for both classical sequential and parallel computer systems The first two chapters are devoted to fast algorithms for solving the Poisson and biharmonic equation In the third Language Notes Text English translation Original Language Czech
