By Boris Mirkin : Core Concepts in Data Analysis: Summarization, Correlation and Visualization

(Undergraduate Topics in Computer Science) cs 101 introduction to computing principles 3 5 units introduces the essential ideas of computing data representation algorithms programming quot;codequot; computer vol7 no3 may 2004 mathematical and natural sciences study on bilinear scheme and application to three dimensional convective equation itaru hataue and yosuke Core Concepts in Data Analysis: Summarization, Correlation and Visualization (Undergraduate Topics in Computer Science):

3 of 3 review helpful Solid book on statistical data analysis By Jennifer A Evans covers some topics in more depth than other books has a unique viewpoint There is a corresponding free online course via Coursera search online won t post links that this book is a companion too 0 of 0 review helpful One Star By Edmund Esterbauer Not the best in its area 0 of Core Concepts in Data Analysis Summarization Correlation and Visualization provides in depth descriptions of those data analysis approaches that either summarize data principal component analysis and clustering including hierarchical and network clustering or correlate different aspects of data decision trees linear rules neuron networks and Bayes rule Boris Mirkin takes an unconventional approach and introduces the concept of mul From the reviews lquo Oriented toward undergraduate students in the computer science field this work offers a unique approach to data analysis by focusing primarily on summarization correlation and visualization techniques instead of more broad based ap
