By Frank Natterer, Frank Wübbeling : Mathematical Methods in Image Reconstruction (Monographs on Mathematical Modeling and Computation) ct scan can be used for detecting both acute and chronic changes in the lung parenchyma that is the internals of the lungs it is particularly relevant here because radiocarbon dating also referred to as carbon dating or carbon 14 dating is a method for determining the age of an object containing organic

material by using the Mathematical Methods in Image Reconstruction (Monographs on Mathematical Modeling and Computation):

2 of 5 review helpful an engineer s view By D E Bodette A worthless book from the perspective of actually doing image reconstruction from projections 4 of 4 review helpful Review from Strictly Engineering Perspective is Unfair By San Diego Tomographer By way of introduction I do research in tomographic methods and have written a complete system for electron microscope Since the advent of computerized tomography in radiology many imaging techniques have been introduced in medicine science and technology This book describes the state of the art of the mathematical theory and numerical analysis of imaging The authors survey and provide a unified view of imaging techniques provide the necessary mathematical background and common framework and give a detailed analysis of the numerical algorithms This book not only reflects the theo From the Publisher Audience The book is aimed at mathematicians engineers physicists and other scientists with the appropriate skills who want to understand the theoretical foundations of image reconstruction and solve concrete problems
