By Maria Litvin, Gary Litvin : Mathematics for the Digital Age and Programming in Python free computer books free mathematics books directory of online free computer programming engineering mathematics technical books programming and coding classes for kids ages 8 16 in singapore taught by graduates of stanford and carnegie mellon learn scratch python swift and more Mathematics for the Digital Age and Programming in Python:

2 of 2 review helpful Math for the Digital Age By M N O I really liked this book It covers basically what an introduction to discrete math would cover but in combination with applications on the excellent programming language Python This combination helps you get in control of otherwise difficult mathematical ideas If you re a programmer it helps you write more efficient code and as a student of math the concepts are In the second edition of

this popular book the authors added two chapters and converted all programming exercises to Python 3 Mathematics for the Digital Age and Programming in Python is written in the same engaging not for dummies style as the Litvins earlier books but it is aimed at younger students It offers a unique blend of mathematics and programming designed to give students in introductory computer science courses an appreciation for the rigorous ma About the Author Maria Litvin has taught computer science and mathematics at Phillips Academy in Andover Massachusetts since 1987 She is an AP Computer Science exam reader since 1996 and provides AP training for high school computer science teachers Maria is
