**By E. Michael Nussbaum : Categorical and Nonparametric Data Analysis: Choosing the Best Statistical Technique** statistics is a branch of mathematics dealing with the collection analysis interpretation presentation and organization of data in applying statistics to eg in statistical modeling regression analysis is a statistical process for

estimating the relationships among variables it includes many techniques for modeling and Categorical and Nonparametric Data Analysis: Choosing the Best Statistical Technique:

Featuring in depth coverage of categorical and nonparametric statistics this book provides a conceptual framework for choosing the most appropriate type of test in various research scenarios Class tested at the University of Nevada the book s clear explanations of the underlying assumptions computer simulations and Exploring the Concept boxes help reduce reader anxiety Problems inspired by actual studies provide meaningful illustrations of the tech
