By Nathan Ida, Joao P.A. Bastos : Electromagnetics and Calculation of Fields electromagnetics and calculation of fields intended for advanced undergraduate or first year graduate students of electrical engineering this introduction to electromagnetic fields emphasizes the computation of fields as well as the development of theoretical relations

computational electromagnetics computational electrodynamics or electromagnetic modeling is the process of modeling the interaction of electromagnetic fields with Electromagnetics and Calculation of Fields:

This introduction to electromagnetic fields emphasizes the computation of fields and the development of theoretical relations It presents the electromagnetic field and Maxwell s equations with a view toward connecting the disparate applications to the underlying relations along with computational methods of solving the equations
