Discrete Mathematics:

This is a text that covers the standard topics in a sophomore level course in discrete mathematics logic sets proof
techniques basic number theory functions relations and elementary combinatorics with an emphasis on motivation It
explains and clarifies the unwritten conventions in mathematics and guides the students through a detailed discussion

on how a proof is revised from its draft to a final polished form Hands on exercises help students understand a conc
About the Author Harris Kwong is a mathematics professor at SUNY Fredonia He was born and raised in Hong Kong
After finishing high school there he came to the United States to further his education He received his B S and M S
degrees from the University of
