**By Martin Cothran : Traditional Logic I, Text** war you know what it is good for stories of unfathomable badassery that's what over the years we at cracked have gathered a formidable collection of these title length color rating magic and superstition in the middle ages superstitions have influenced the lives of human beings perhaps since the beginning of mankind Traditional Logic I, Text:

9 of 10 review helpful Excellent book By Paul D Carr As anyone who has ever read Aristotle knows he can be a tough

read Even in a good translation he can be hard to understand He has a tendency to cover a topic meticulously to an extreme so it helps when someone like Cothran extracts and organizes a complex subject like logic Learning Aristotle's logic from directly reading the Organon is not as easy as learning it from a logic course for all ages but designed for use as young as 7th grade Traditional Logic is an in depth study of the classical syllogism Along with a basic understanding of the Christian theory of knowledge the text presents the four kinds of logical statements the four ways propositions can be opposed the three ways in which they can be equivalent and the seven rules for the validity of syllogisms This comprehensive but easy to use course can be used as a
