By Slawomir Stanczak, Marcin Wicznanowski, Holger Boche : Resource Allocation in Wireless Networks: Theory and Algorithms (Lecture Notes in Computer Science / Theoretical Computer Science and General Issues) clearing the clouds away from the true potential and compendium of all course descriptions for courses Resource Allocation in Wireless Networks: Theory and Algorithms (Lecture Notes in Computer Science / Theoretical Computer Science and General Issues):

The wireless industry is in the midst of a fundamental shift from providing voice only services to offering customers an array of multimedia services including a wide variety of audio video and data communications capabilities Future wireless networks will be integrated into every aspect of daily life and therefore could affect our life in a magnitude similar to that of the Internet and cellular phones This monograph demonstrates that these emerging applic
