By R.J. Stroeker, J.F. Kaashoek : Discovering Mathematics with Maple: An interactive exploration for mathematicians, engineers and econometricians Discovering Mathematics with Maple: An interactive exploration for mathematicians, engineers and econometricians:

This unusual introduction to Maple shows readers how Maple or any other computer algebra system fits naturally into a mathematically oriented work environment. Designed for mathematicians, engineers, econometricians, and other scientists, this book shows how computer algebra can enhance their theoretical work. A CD ROM contains all the Maple worksheets presented in the book. This book distinguishes itself: the reader learns how to use MAPLE by posing problems of strictly mathematical nature, and as a result, the reader gets insight into the practical and theoretical framework of mathematics. Highly recommended.
