By Andrea Bacciotti : Local Stabilizability of Nonlinear Contr (Advanced Series in Dynamical Systems) Local Stabilizability of Nonlinear Contr (Advanced Series in Dynamical Systems):

This is one of the first books presenting stabilizability of nonlinear systems in a well organized and detailed way the problem its motivation features and results Control systems defined by ordinary differential equations are dealt with Many worked examples have been included The main focus is on the mathematical aspects of the problem but some important applications are also described This book will be suitable as a textbook for advanced university courses and
