By Boling Guo, Xueke Pu, Fenghui Huang : Fractional Partial Differential Equations and Their Numerical Solutions in this paper the basic theory for the initial value problem of fractional differential equations involving riemann liouville differential operators is discussed solving partial differential equations with octave pdeone the runge

kutta chebyshev ode integrator rkcf this is the first release of some code i have written for Fractional Partial Differential Equations and Their Numerical Solutions:

This book aims to introduce some new trends and results on the study of the fractional differential equations and to provide a good understanding of this field to beginners who are interested in this field which is the authors beautiful hope This book describes theoretical and numerical aspects of the fractional partial differential equations including the authors researches in this field such as the fractional Nonlinear Schr ouml dinger equations fractiona From the Inside Flap This book aims to introduce some new trends and results on the study of the fractional differential equations and to provide a good understanding of this field to beginners who are interested in this field which is the
